Tri Chemical Laboratories Inc.

Notice Regarding Acquisition of SBTi Certification for Greenhouse Gas Emission Reduction Targets

Tri Chemical Laboratories Inc. announces that the Group's greenhouse gas emission reduction targets have been certified by the Science Based Targets initiative (SBTi).

Science-based targets (SBTs) are greenhouse gas emission reduction targets consistent with the level established by the Paris Agreement*.

The targets certified by SBTi are as follows:

Tri Chemical Laboratories Group greenhouse gas emission reduction targets

Base FY	Scope	Target	Target FY
2024	Scope 1&2	42% or more	2030
	Scope 3	25% or more	

The Group recognizes climate change as one of its key material issues for management. Under our management philosophy of “Contributing to the development of leading-edge technology through science and technology to realize the creation of leeway for people,” we will continue to pursue sustainable management to achieve these targets as we contribute to realizing a decarbonized society and enhance the corporate value of the Group.

*The goal is to hold the increase in the global average temperature to well below 2°C above pre-industrial levels and pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels.
